## Solutions

12. On the 42-km go-cart course at Sportsworld, Arshit drives 0.4 km/h faster than Sarah, but she has engine routhly part way around the course and has to stop to get the go-cart fixed. This stop costs Arshit one-half hour, and so she arrives 15 min after Sarah at the end of the course. How fast did each girl drive and
how long did each girl take to finish the course? Answer to one decimal place.    Dist   Speed   Time
Arshia 42 x+0.4 42 x+0.4
C-106 110 x 42/
Archia steps for 30 mins, arrives 15 mins after sarah
ADNIA 4
$\frac{42}{x} - \frac{42}{x + 0.4} = 0.25$ 15 mins
$42(x+0.4) - \frac{42(x)}{x(x+0.4)} = 0.25$
x(x+0.4) x(x+0.4)
$42x + 16.8 - \frac{42x}{42 \times 10^{-10}} = 0.25$
$\frac{1}{x(x+0.4)}$ $x(x+0.4)$
16.8 = 0.25
~(~+04)
$16.8 = 0.25 \times (x + 0.4)$
11 0 - 0 25x + 0,12
a - 075x2+0.1x-16,0
$0 = 25x^2 + 10x^{-1000}$
$= -10 \pm \sqrt{(10)^2 + 4(25)(-1680)}$
$2(25) \qquad S_{a}(ab) = 8  km/h$
$\chi = \frac{-10 \pm \sqrt{168100}}{50}$ Time = $\frac{42}{8}$ = $5\frac{1}{4}$ house
$\chi = \frac{1}{50}$ = $5/4$ hous
400 x = 50 Archia = 8.4 km/
x = 8  km/h $x = -8.4  km/h$ $x = -8.$
$x = 8  \text{km/h}$ $= 5  \frac{1}{2}  \text{hours}$
Extranoous = 52 hours
